About

Hi, I'm a software developer that interested in pretty much everything about software.

Currently developing full-stack software with React, Vue, Angular and NodeJS.

Passionate about writing clean, maintainable, and testable code.

Also interested in Software Architecture and UI/UX design.

Experience

Jun 2022 – present

Software Developer, StepFront™

- Working as a Front-end developer as well as PM/PO in a project which is somewhat complex in terms of business logic.
- Working with management team to figure out the best JIRA workflow for the team.
- Working closely with UI/UX Designer to make the most out of the design.

April 2021 – Jun 2022

Software Developer, Supply Chain Wizard

- Worked with complex business logic that is calculating OEE.
- Decreased development time by ~90% on an Advanced Filter service that is can be implemented in several lines of code, while similar modules required 1 to 5 days of effort to implement.
- Participated in a documentation team that prepared documentation for QAs and developers.
- Participated in a code standards team which set the coding standard rules for both the front-end projects and back-end projects.
- Decreased some endpoint's response time by ~50%.

Oct 2020 – April 2021

UI/UX Specialized Front-end Developer, DOGO Tasarım

- Optimized image dimensions and encoding which led ~66% decrease in total image size.
- Decreased front-end initial page response time by ~33%.
- Delivered e-mail template task 2 weeks earlier which increased sales by ~10% in that period.
- Increased total lighthouse score by ~20%.
- Delivered POC's for possible rewrite of the site.
- Eliminated CLS issues by ~99%.
